SINCE 1992

### Year 1 EMG Course

Are you looking to help your child excel in Year 1 and build a strong academic foundation from the very beginning? Our EMG Course is designed to do exactly that. This program provides a rich and structured learning experience that strengthens core skills, nurtures curiosity, and prepares students for future academic challenges. By enrolling in the EMG Course, your child will gain the confidence, knowledge, and discipline needed to thrive throughout their schooling journey.!

#### What to expect:

- ✚ **A challenging and stimulating curriculum:** Students will engage with advanced modules across English, Mathematics, and General Ability. These lessons go beyond the standard Year 1 level, encouraging deeper thinking and helping students develop strong study habits early on. Families should expect to dedicate consistent weekly time to support learning and revision.
- ✚ **A valuable head start:** The course is designed to place students ahead of the curve. By mastering key concepts early, children feel more confident in class, adapt quickly to new topics, and develop a positive attitude toward learning.
- ✚ **English: Strengthening language foundations:** Students develop strong reading comprehension skills through a range of age-appropriate texts. They practise identifying key information, inferring meaning, and building vocabulary, all essential for both classroom learning and formal assessments.
- ✚ **Mathematics: Deepening understanding of core concepts:** The numeracy component reinforces foundational maths concepts, including number operations, basic measurement, and early data skills, in a way that builds genuine understanding. Students develop the confidence to approach maths problems methodically, check their work, and explain their reasoning.
- ✚ **General Ability: Boosting reasoning and problem-solving skills:** This module sharpens the reasoning and thinking skills that underpin success across all subject areas. Through pattern recognition, logical sequences, spatial reasoning, and word problems, students strengthen their ability to think flexibly, work through unfamiliar challenges, and approach problems from multiple angles

#### Year 1 Term 3 Course (Saturday, 18 July – 26 September)

Course	Session	Class Time
Year 1 EMG	Saturday Morning	9:00am – 12:25pm

- ✚ **Enrolment Policy:** To ensure consistency and uninterrupted learning, students must remain in their enrolled course until completion. Transfers to other branches or course changes are not permitted during the course duration.
