Saturday, 18 July

Term 3 begins.

Saturday, 1 August

Term 3 book review competition

Saturday, 15 August

19th drawing competition

Saturday, 26 September

Term 3 ends

Year 2 WEMT Course

Our WEMT program is built on a simple belief: every child has the capacity to excel academically. What they often need is a structured environment and skilled guidance. That's exactly what this course delivers, in a way that builds genuine confidence, not just exam technique. If your child needs to build stronger academic foundations for the year ahead, our WEMT course provides everything they need to thrive.

Exam Readiness: Students build a solid, well-rounded foundation across reading, writing, mathematics, and thinking skills. Structured lessons equip them with the confidence and targeted strategies needed to approach any assessment calmly and effectively.

Mastering Reading Comprehension: Learners develop powerful, repeatable techniques for analysing complex texts across a range of genres and styles. They practise interpreting meaning at both literal and inferential levels, constructing well-reasoned responses, and selecting accurate multiple-choice answers under timed conditions. Close reading becomes second nature.

Mathematics Made Easy: The course reinforces key mathematical concepts, essential formulas, and flexible problem-solving methods. Students work through number, measurement, geometry, and data — developing the clarity and assurance to handle any question format. We emphasise understanding over memorisation so that students can adapt to unexpected problems with ease.

Mind-Stimulating Thinking Skills: Through engaging, brain-boosting activities, students sharpen critical thinking, logical reasoning, and pattern recognition. Each module is designed to be genuinely enjoyable, encouraging students to apply analytical skills in interactive, puzzle-driven ways that keep them motivated and intellectually curious.
